See “Use and Definitions of Non-GAAP Financial Measures” below for additional information.

## **Use and Definitions of Non-GAAP Financial Measures**

Otis Worldwide Corporation ("Otis") reports its financial results in accordance with accounting principles generally accepted in the United States ("GAAP"). We supplement the reporting of our financial information determined under GAAP with certain non-GAAP financial information. The non-GAAP information presented provides investors with additional useful information, but should not be considered in isolation or as substitutes for the related GAAP measures. Moreover, other companies may define non-GAAP measures differently, which limits the usefulness of these measures for comparisons with such other companies. We encourage investors to review our financial statements and publicly filed reports in their entirety and not to rely on any single financial measure. A reconciliation of the non-GAAP measures (referenced in this press release) to the corresponding amounts prepared in accordance with GAAP appears in the attached tables. These tables provide additional information as to the items and amounts that have been excluded from the adjusted measures.

Adjusted net sales, organic sales, adjusted selling, general and administrative ("SG&A") expense, adjusted operating profit, adjusted net income, adjusted diluted earnings per share ("EPS"), adjusted effective tax rate, adjusted remaining performance obligation ("RPO"), constant currency and free cash flow are non-GAAP financial measures.

Adjusted net sales represents net sales (a GAAP measure), excluding significant items of a non-recurring and/or nonoperational nature ("other significant items").

Organic sales represents consolidated net sales (a GAAP measure), excluding the impact of foreign currency translation, acquisitions and divestitures completed in the preceding twelve months and other significant items. Management believes organic sales is a useful measure in providing period-to-period comparisons of the results of the Company's ongoing operational performance.

Adjusted SG&A expense represents SG&A expense (a GAAP measure), excluding restructuring costs and other significant items.

Adjusted general corporate expenses and other represents general corporate expenses and other (a GAAP measure), excluding restructuring costs and other significant items.

Adjusted operating profit represents income from continuing operations (a GAAP measure), excluding restructuring costs and other significant items.

Adjusted net interest expense represents net interest expense (a GAAP measure), adjusted for the impacts of non-recurring acquisition related financing costs and related net interest expense pending the completion of a transaction.

The adjusted effective tax rate represents the effective tax rate (a GAAP measure) adjusted for other significant items and the tax impact of restructuring costs and other significant items.

Adjusted net income represents net income attributable to Otis Worldwide Corporation (a GAAP measure), excluding restructuring costs and other significant items, including related tax effects. Adjusted EPS represents diluted earnings per share attributable to common shareholders (a GAAP measure), adjusted for the per share impact of restructuring and other significant items, including related tax effects.

Adjusted RPO or Adjusted Backlog represents RPO (otherwise referred to herein as backlog from time to time) (a GAAP measure) excluding other significant items.

Management believes that adjusted net sales, organic sales, adjusted SG&A, adjusted general corporate expenses and other, adjusted operating profit, adjusted net income, adjusted EPS, the adjusted effective tax rate and adjusted RPO are useful measures in providing period-to-period comparisons of the results of the Company's ongoing operational performance.

Additionally, GAAP financial results include the impact of changes in foreign currency exchange rates ("AFX"). We use the non-GAAP measure "at constant currency" or "CFX" to show changes in our financial results without giving effect to period-to-period currency fluctuations. Under U.S. GAAP, income statement results are translated in U.S. dollars at the average exchange rate for the period presented. Management believes that this non-GAAP measure is useful in providing period-to-period comparisons of the results of the Company's ongoing operational performance.

Free cash flow is a non-GAAP financial measure that represents cash flow from operations (a GAAP measure) less capital expenditures. Management believes free cash flow is a useful measure of liquidity and an additional basis for assessing Otis' ability to fund its activities, including the financing of acquisitions, debt service, repurchases of common stock and distribution of earnings to shareholders.

When we provide our expectations for adjusted net sales, organic sales, adjusted operating profit, adjusted net interest expense, adjusted net income, adjusted effective tax rate, adjusted EPS and free cash flow on a forward-

looking basis, a reconciliation of the differences between the non-GAAP expectations and the corresponding GAAP measures (expected diluted EPS from continuing operations, operating profit, the effective tax rate, net sales and expected cash flow from operations) generally is not available without unreasonable effort due to potentially high variability, complexity and low visibility as to the items that would be excluded from the GAAP measure in the relevant future period, such as unusual gains and losses, the ultimate outcome of pending litigation, fluctuations in foreign currency exchange rates, the impact and timing of potential acquisitions and divestitures, and other structural changes or their probable significance. The variability of the excluded items may have a significant, and potentially unpredictable, impact on our future GAAP results.
